The BMW C400GT takes the C400X as a base launched in 2018.

It improves it with elements that make it the perfect scooter
to move around both the city and the surroundings.

On the C 400 X platform,

BMW Motorrad has developed the new C 400 GT,

a Premium scooter that according to what is understood by its
nomenclature and what is guessed when contemplating it,

is a model of more tourist aspirations than the " X "from
which it derives. Both the aforementioned «X» and this «GT»
are two very important models for the great Bavarian brand.

With both aims to break into a segment that in Spain is one of
the strongest and that grows every year. According to the

latest data, in 2018 about 16,000 scooters between 250 and 500 cc have been registered in our country, which represents an increase greater than eleven percent compared to 2017. Other studies confirm that the average age of users of these Scooter is around 38 years old and they are mainly used as a work tool to move quickly and quickly in the urban environment. They also value their good performance and ease of financing, so the BMW C 400 can fit very well in the category and even better when offered in two variants.
